

Invoice processing automation

The EzeScan Invoice Processing Automation solution takes care of the scanning and data entry of supplier invoices, then outputs them to a finance system or an EDRMS, or both.

On top of the EzeScan batch scanning interface, EzeScan uses smart OCR to intelligently find and extract invoice data automatically. The operator can then review the data extracted from the invoice and correct any exceptions. Your invoice documents and data can then be exported to a customisable data file, uploaded into an EDRMS or a database, or both, for your finance system to process.

The solution allows for cross-referencing with your finance system to perform tasks such as validating suppliers, validating open purchase orders against a supplier and to return other supplier information.

The EzeScan Invoice Processing Automation solution cuts down the time an accounts payable officer spends on manual data entry and on manual handling of invoices in the office.

The EzeScan Advantage

EzeScan provides fast, cost effective business solutions including simplified back scanning, automation of invoice processing, forms data extraction, mailroom/correspondence automation and highly integrated EDRMS imaging. Compatible with all major scanners and with over 600 installations in Australasia, North America, EMEA and the UK, EzeScan is your ideal batch-scanning solution.

Who is Outback Imaging Pty Ltd?

Outback Imaging is a research and development company specialising in document capture. EzeScan is Outback Imaging's flagship document scanning product suite. Our products enable clients to substantially reduce the cost of deploying document processing solutions for unstructured, semi structured and structured (forms based) hardcopy documents.

To request an evaluation copy of EzeScan or to see a product demonstration, please contact your local EzeScan representative.
