

Mailroom & correspondence automation

The EzeScan Mailroom and Correspondence Automation solution has a simple, user-friendly interface. Using a high-speed TWAIN/ISIS compliant scanner or MFD you can rapidly acquire high quality scanned images. The EzeScan operator interface makes it quick and easy for operators to QA images for tasks like image enhancements, rotating, appending, replacing or inserting pages.

Customise your indexing profiles for different document types or automate your data entry by using barcodes.

The EzeScan indexing interface allows the setting of default data and also options to remember data for an entire batch of documents. Documents and data can then be output to many common EDRM systems, databases or network locations.

Eliminate scanning bottlenecks by breaking the process down into scan, index, OCR and upload stages, then spreading the process across multiple computers and operators.

The EzeScan Advantage

EzeScan provides fast, cost effective business solutions including simplified back scanning, automation of invoice processing, forms data extraction, mailroom/correspondence automation and highly integrated EDRMS imaging. Compatible with all major scanners and with over 600 installations in Australasia, North America, EMEA and the UK, EzeScan is your ideal batch-scanning solution.

Who is Outback Imaging Pty Ltd?

Outback Imaging is a research and development company specialising in document capture. EzeScan is Outback Imaging's flagship document scanning product suite. Our products enable clients to substantially reduce the cost of deploying document processing solutions for unstructured, semi structured and structured (forms based) hardcopy documents.

To request an evaluation copy of EzeScan or to see a product demonstration, please contact your local EzeScan representative.
