

Laserfiche® INTEGRATION

INTEGRATION BENEFITS:

- ✓ Centralized capture for high volume batch scanning
- ✓ Enterprise decentralized capture for hard copy and digital born documents
- ✓ Automated naming and filing of documents based on your business rules.
- ✓ Import TIF and PDF documents directly
- ✓ Redaction tools for FOI requests
- ✓ EzeScan's "Quick Redact" for automatic black out of selected zones on forms
- ✓ Save documents into Repository folders, or Record Series folders
- ✓ Automatically create Folder structure when uploading documents
- ✓ Automatically assign Template Fields and Tags when uploading documents
- ✓ Append or Prepend pages to an existing Laserfiche record.

Take the hard work out of capturing your documents with EzeScan's seamless integration with Laserfiche.

With advanced power indexing features, EzeScan delivers the fastest, most cost-effective method available to capture and register both your hard copy and electronic documents (including email) directly into Laserfiche. EzeScan software solutions can transform and automate your manual business processes into highly intelligent digital workflows. Reduce the amount of time physically handling and processing documents across your organization, with deployments for both high volume document capture and decentralized workgroup capture. EzeScan provides automated scanning, image enhancement, data capture, validation and upload, all designed to limit the amount of user intervention and excessive manual processing and get your information working for you faster.

INFORMATION CAPTURE FOR ALL YOUR STAFF

Help your entire team capture business-critical information and put it to use, faster with EzeScan's Webapps. For both hardcopy capture from an MFP or registering digital born documents; with EzeScan your staff can automatically capture and save their documents from any location directly into your line of business processes. EzeScan's web browser interface enables staff to QA, validate and register their documents from their computer or mobile device, anytime, anywhere. With no desktop software to install, let EzeScan do the hard work and automatically name and file your documents in the correct naming convention to the correct location!

HIGH VOLUME DOCUMENT CAPTURE

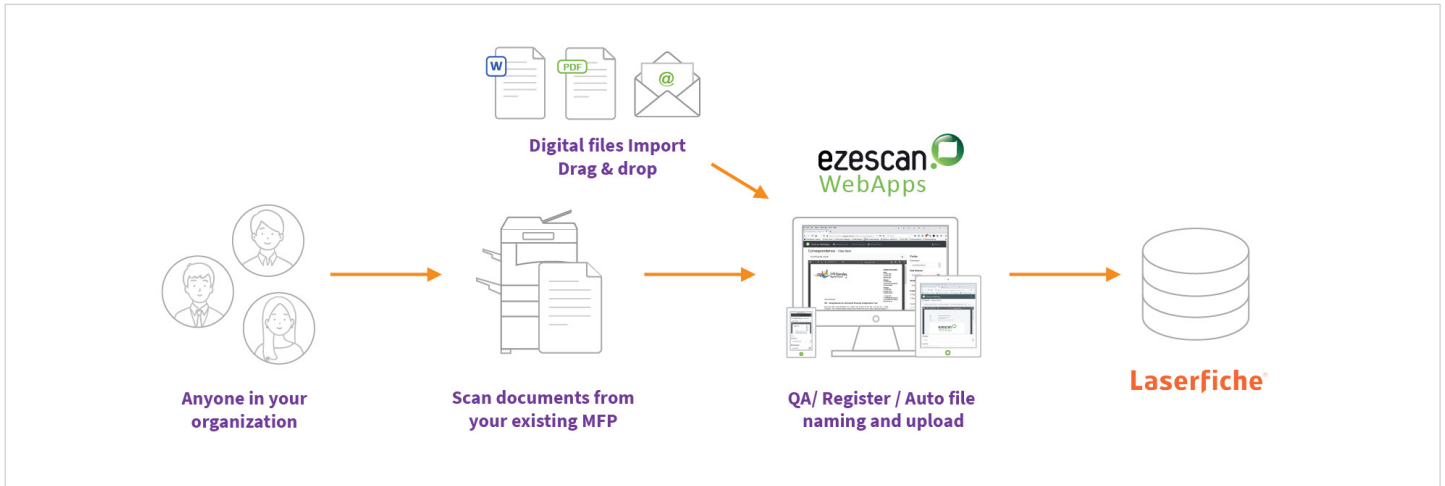

As a batch capture tool, EzeScan can help you capture large volumes of paper based, digital born documents and corporate email. EzeScan's power indexing wizard guides an operator through the registration process capturing data when possible, via zonal OCR or use of the OCR pen. Perform database lookups on the fly or select fields data via drop down menus. Define and reuse static metadata to limit the number of keystrokes or eliminate them altogether and deliver impressive productivity gains. Save and reuse your scan job workflows including your digitization standards and selected image enhancements. Numerous output image formats can be selected including TIF and text searchable PDF, PDF/A. Scan and process as many documents as you want without any volume-based restrictions.

SEAMLESS INTEGRATION WITH LASERFICHE

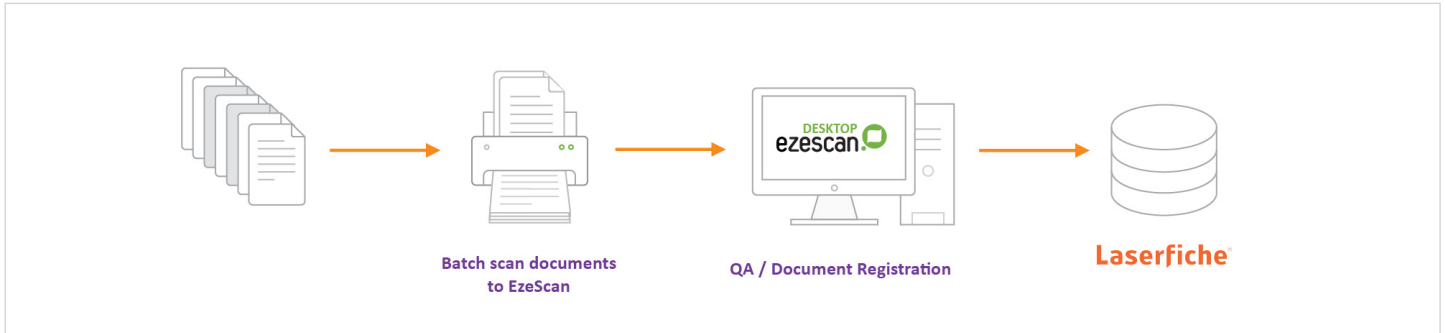

EzeScan provides 'out of the box' native integration with Laserfiche. To the end user this means a seamless experience when capturing and registering documents into Laserfiche. With a highly configurable interface, EzeScan provides rapid deployment measured in days.

HOW IT WORKS

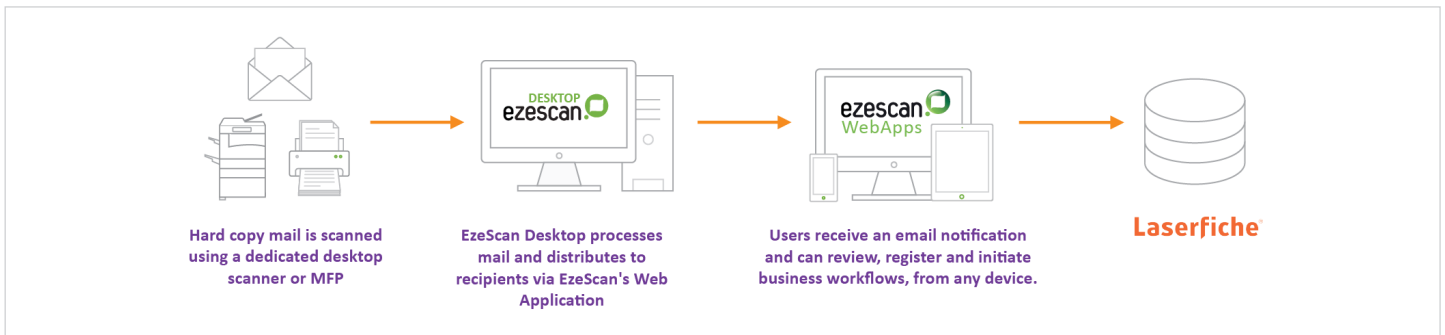

Decentralized Adhoc Capture

High Volume Centralized Capture

Digital Mailroom Workflow

THE EZESCAN ADVANTAGE
