

Blackbaud Raiser's Edge NXT[®] GIFT PROCESSING AUTOMATION

INTEGRATION BENEFITS:

- ✓ Reduce the amount of time and cost to process donations.
- ✓ Effortlessly capture your gift data.
- ✓ Create batches from scanned checks, donation cards, web donations and emails.
- ✓ Apply processing validation rules (e.g. valid constituent, valid credit card number.)
- ✓ Tokenise and securely capture credit card numbers.
- ✓ Quickly add new constituents on the fly.
- ✓ Automatically attach a redacted PDF copy of the gift documentation to the gift or constituent record in RE NXT.
- ✓ Get your donations into RE NXT faster!

At EzeScan we understand that key business KPI's for fundraising organisations are increased efficiency, donor interaction and donations, all of which take time.

With EzeScan's The Raiser's Edge NXT integration, you can reduce the amount of time and cost to process donations. EzeScan delivers the fastest, most cost-effective method available to seamlessly and accurately capture both hard copy and electronic remittances into your donation and check scanning workflows. Ultimately giving your organisation more time to focus on raising funds rather than processing them.

EFFORTLESSLY CAPTURE YOUR DONATIONS

Scan your donations using EzeScan's professional production batch scanning capabilities or import from a folder or direct from an email account. Save and reuse your scan job workflows including your digitisation standards and selected image enhancements. Numerous output image formats can be selected including TIF and text searchable PDF, PDF/A. EzeScan provides support for a large range of scanner hardware including multifunction devices.

AUTOMATE YOUR DONATION PROCESSING

By limiting the number of keystrokes or eliminating them altogether, EzeScan can deliver impressive productivity gains. Let EzeScan capture your selected donation data values from all your remittance slips and checks using built-in OCR recognition technology and lookup capabilities. These values can be validated against your fundraising data base to ensure data integrity is maintained and errors are flagged. If required an operator can effortlessly correct any errors on the fly. EzeScan provides automated scanning, image enhancement, data capture, validation and upload including your web based donations.

INTEGRATE WITH RASIER'S EDGE

EzeScan provides 'out of the box' native integration with The Raiser's Edge NXT. With a highly configurable interface, EzeScan provides rapid deployment measured in days, not months, eliminating the need for expensive and time consuming custom scripting or programming services.

DEPLOYMENT OPTIONS:

1 EZESCAN (PRO) WORKSTATION

Scan/import your donations into EzeScan and perform validation as you go

2 EZESCAN SERVER

SERVER
ezescan.

Automatically import your donations into EzeScan SERVER for validation
