

Highly Integrated EDRMS Imaging Solutions

EzeScan integrates well with many popular EDRM systems, allowing scanning at high speed using a TWAIN/ISIS compliant scanner or MFD. The scanned documents are delivered into the EzeScan batch scanning interface where image enhancements are applied, allowing the operator to perform QA tasks on them.

Indexing allows the operator to key data in from the image or extract document metadata, allows two way communication with the EDRMS, saves the document to the correct location, populates metadata and triggers related workflows. The indexing interface also allows for high speed indexing by setting workflow defaults and reusing of metadata in a scanned batch.

The upload process delivers your documents as high quality, crystal clear images into your EDRMS with all indexing data applied.

Using an EzeScan EDRMS workflow will greatly increase the work rate for data entry of hard copy documents into your EDRMS. Please contact us for more information on the EzeScan native EDRMS integrations that we provide.

The EzeScan Advantage

EzeScan provides fast, cost effective business solutions including simplified back scanning, automation of invoice processing, forms data extraction, mailroom/correspondence automation and highly integrated EDRMS imaging. Compatible with all major scanners and with thousands of installations in Australasia, North America and the UK, EzeScan is your ideal production batch capture solution.

Who is Outback Imaging?

Outback Imaging is a research and development company specialising in document capture and business process automation. EzeScan is Outback Imaging's flagship document capture product suite. Our products enable clients to substantially reduce the cost of deploying data capture and information processing solutions for unstructured, semi structured, structured hardcopy and electronic documents including email.

To request an evaluation copy of EzeScan or to see a product demonstration please contact your local EzeScan representative.
