

Shexie Integration

Medical Record Scanning

At Outback Imaging we understand the importance of getting your clinical information and patient data into your management systems accurately and in a timely manner. We also understand that the largest time wasters in the digitisation process are document preparation, assigning scan documents to the correct patient and preventing inaccurate data entry.

EzeScan delivers “out of the box” integration via any TWAIN or ISIS scanner, or MFD (multi-function device) providing the fastest and most cost effective method to batch scan, process documents and deliver high quality images directly into Shexie.

When scanning documents or forms with EzeScan, medical admin staff can browse the Shexie patients table on the fly and automatically match and name the documents before being sent to Shexie.

For example: Scan a batch of patient documents in one go. EzeScan can then automatically search each document and capture the patient’s details (eg surname, DOB) and validate those with the details in Shexie, automatically uploading the documents into the patient record.

EzeScan can greatly simplify the task of converting your paper archives of patient records into user friendly PDF format. It will speed up the task of opening each days mail and scanning those documents into Shexie.

EzeScan: Your ideal solution for digitising your past history patient files and for digitising your ongoing day to day scanning.

- Reduce document preparation
- Batch scanning
- Image enhancement
- Scan job profiles
- Digitisation standards compliant
- Support for any brand of scanner

- Reduce data entry
 - digital filing
 - forms processing
 - invoice processing
 - back scanning solutions
- Intelligent data capture

- Automated batch scanning
- Automated image enhancement
- Automated data capture
- Automated upload to
 - PMS
 - line of business applications

- Native support for many PMS
- Validate and return metadata from your databases
- Integrated database lookups to eliminate data entry

scan • capture • automate • integrate

Shexie Integration

EzeScan solutions range from scan only workstations, index only workstations, and basic manual data entry to highly automated forms processing systems, all without a per-page scan click charge.

Flexible licensing and deployment options are available for software and scanners based on ownership or rental.

Modular design

EzeScan Health Solutions Bundle for Shexie Integration

The EzeScan HS Bundle includes the essential EzeScan modules required to batch scan, power index and upload to supported PMS.

The EzeScan HS Bundle provides the scanning interface to scan, QA and process batches of documents. The power indexing capabilities guide the operator to input, capture and validate data, database lookup and upload the documents into supported PMS at speeds previously unattainable. With this configuration you can type in an index value, choose a lookup list value, or capture index values from documents (using the inbuilt OCR module) and then use them to populate respective fields in the supported PMS. You also have the choice to reuse fields automatically, or auto populate, saving considerable time not having to reselect the same values. This option provides the fastest and most effective method for profiling batches of documents. Select an EzeScan HS Bundle today, safe in the knowledge that you can add modules for optional data capture technologies at a later time.

The EzeScan Advantage

EzeScan provides fast, cost effective business solutions including simplified back scanning, automation of invoice processing, forms data extraction, mailroom/correspondence automation and highly integrated EDRMS imaging. Compatible with all major scanners and with thousands of installations in Australasia, North America, EMEA and the UK, EzeScan is your ideal production batch capture solution.

Who is Outback Imaging?

Outback Imaging is a research and development company specialising in document capture and business process automation. EzeScan is Outback Imaging's flagship document capture product suite. Our products enable clients to substantially reduce the cost of deploying data capture and information processing solutions for unstructured, semi structured, structured hardcopy and electronic documents including email.

To request an evaluation copy of EzeScan or to see a product demonstration please contact your local EzeScan representative.
